

# Lithuanian Biotech Sector Organisations

Event Participants

# Association LithuaniaBIO

LithuaniaBIO is the **largest national association** which represents **companies, research and study institutions, health care institutions, NGOs** and promotes the wider application of life sciences and biotechnology in the Lithuanian economy in solving global environmental and quality of life challenges.

Focus:

Life Sciences

Health Technologies

Bioeconomy

Memberships:

# Biomatter

[www.biomatter.ai](http://www.biomatter.ai)

Biomatter is a synthetic biology company that creates new proteins for health and sustainable manufacturing. The company has developed the Intelligent Architecture™ platform that addresses the main limitations of current engineering approaches to unlock new horizons for digital protein design and development. Biomatter partners with leading companies from diverse industries to create new products and technologies based on unique enzymes that capture existing markets and enable blue-ocean opportunities.

# biomatter

CEO – Laurynas Karpus  
[hello@biomatter.ai](mailto:hello@biomatter.ai)

# Caszyme

[www.caszyme.com](http://www.caszyme.com)

Caszyme specializes in development and applications of CRISPR-Cas technology.

Activities:

- CRISPR research and development
- Platform of characterized Molecular Tools
- Cas protein purification and biochemical analysis

Karolina Makovskyte  
Head of Business Development

[karolina@caszyme.com](mailto:karolina@caszyme.com)

# Cureline Baltic

[www.curelinebaltic.com](http://www.curelinebaltic.com)

Global CRO providing preclinical research services and human biospecimens for accelerated drug R&D and Dx development in the fields of oncology, immuno- oncology, metabolic and autoimmune and other diseases.

Activities:

- small animal studies
- analytical services
- human biospecimen procurement

Agnė Vaitkevičienė – COO

[Agne@cureline.com](mailto:Agne@cureline.com)

# Exolitus

[www.exolitus.com](http://www.exolitus.com)

R&D-intensive startup developing exosome ingredients for medicinal, cosmeceutical, and nutraceutical products. Provides a one-window service for:

- exosome design
- exosome preclinical development
- exosome large-scale production

CEO – Aistė Jekabsone

[info@exolitus.com](mailto:info@exolitus.com)

# Fitodenta

[www.fitodenta.com](http://www.fitodenta.com)

Fitodenta products accelerate oral treatment and recovery while prioritizing patient safety and satisfaction. We focus on the area of plant biotechnology and the application of plant-based substances in odontology and dental care. Our novel products are based on traditional herbal remedies that can effectively substitute or complement conventional medicine approaches in dental treatment protocols as well as in oral hygiene.

# Kaunas University of Technology | KTU

[en.ktu.edu](http://en.ktu.edu)

Kaunas University of Technology (KTU) is one of the largest technological universities in the Baltic States.

The University can be proud of:

- competitive study programme portfolio and modern process of studies;
- research and experimental development corresponding to societal needs;
- transfer of technology and innovation to business and society.

Rector Prof Eugenijus Valatka

# LAIMA – Laboratory Inventory Management

[www.laima.bio](http://www.laima.bio)

Biotech Inventory Companion  
Your streamlined inventory management tool

- Real-time Inventory Tracking
- Informative Reporting
- Seamless Invoice Management
- Efficient Data Capture

**Laima**  
**Laboratory Inventory Manager**

# Lithuanian University of Health Sciences | LUHS

[www.lsmu.lt](http://www.lsmu.lt)

As the leading academic institution in biomedical sciences in Lithuania we successfully integrate studies, research, clinical practice, and innovations management. This is achieved in partnership with LUHS Kauno Klinikos & LUHS Kaunas Hospital.

- Research & Development
- Validation with patients
- Transfer of Scientific Results & Commercialization

LITHUANIAN UNIVERSITY  
OF HEALTH SCIENCES

# Northway Biotech

[www.northwaybiotech.com](http://www.northwaybiotech.com)

Northway Biotech, a global biologics CDMO, offers end-to-end biopharmaceutical services globally. With expertise spanning from cell line development to cGMP manufacturing, we ensure full compliance in all stages. Founded in 2004, we operate in Vilnius, London, and Waltham, MA.

Development services: cell line, process, formulation, analytics. cGMP manufacturing: drug substances/products. Quality & regulatory CMC support

CEO and Chairman of the Board  
Prof. Vladas Algirdas Bumelis  
[vladas.bumelis@northwaybiotech.com](mailto:vladas.bumelis@northwaybiotech.com)

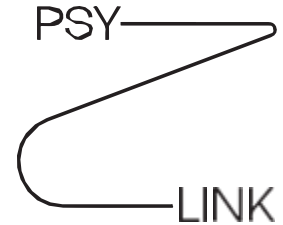

# Psylink

[www.psylink.io](http://www.psylink.io)

Psylink is a biotechnology company offering a novel solution to small molecule drug development. Our versatile biosynthesis platform enables to produce classic psychedelics as well as new chemical entities with desired properties.

- Development and licensing fermentation and purification technologies of well-known and new chemical entities.
- Discovery and production of new chemical compounds using synthetic biology and metabolic engineering.

# Sanobiotec

[www.sanobiotec.com](http://www.sanobiotec.com)

Activities:

- innovative solution provider
- largest producer of minor cannabinoids
- pioneer in cannabinoid research

Sanobiotec stands as a pioneering force in cannabinoid research and production, established in 2018 with an unwavering mission: to unlock the potential of cannabinoids for targeted ailment treatment. Today, we take pride in our global leadership, having evolved into a prominent producer of minor cannabinoids with warehouses in the US and Japan, and sales spanning over 40 countries.

Our unrelenting focus on quality, process optimization, and rapid product development has not only redefined industry standards but also introduced groundbreaking innovations. With an unwavering commitment to excellence, the delivery of exceptional products, and a holistic approach, we help our clients advance their products to the next level.

With an aspiration to serve as a beacon of knowledge in the realm of cannabinoid manufacturing, we are catalyzing advancements that profoundly impact lives on a global scale.

# Wellgem Biopharma

[www.wellgem.com](http://www.wellgem.com)

The company was founded in 2022 by biotechnology and biopharmaceutical sector professionals working in the industry for about 20 years.

Main activities:

Development of biopharmaceutical preparations

- Consultancy services
- Contract manufacturing, testing and contract process development

Nerijus Bernotas – Company manager
